Maths Week 3 plus: fractions (written)

Ember · Real AQA GCSE Maths Higher questions (non-calculator) · about 15 minutes Date: _____

Skill: written method and checking. Write every step. Method marks (M1) are for working you can see. Under each answer, write a **check**: an estimate, or work backwards.

AQA Maths 8300/1H, November 2022, Q8 **[3 marks]**

Work out $\left(\frac{7}{10} - \frac{4}{15}\right) \div \frac{2}{3}$

Give your answer as a fraction.

Working

Answer _____

Check: _____

AQA Maths 8300/1H, June 2025, Q8 **[3 marks]**

Work out $\frac{4}{15} + \frac{1}{5} \div \frac{1}{2}$

Give your answer as a fraction.

Working

Answer _____

Check: _____

Before you mark: in the second question, which did you do first, the + or the ÷? Why?

Self-check (5 min)

□ I did the bracket first in the first question.

□ I did the ÷ before the + in the second question.

□ I found a common denominator before adding or subtracting.

□ To divide, I multiplied by the reciprocal.

□ My answers are fractions (not decimals), and I wrote a check under each.

AQA mark scheme: November 2022, Q8 (3 marks)

- Valid common denominator for the subtraction, with at least one numerator correct, e.g. $\frac{21}{30} - \frac{8}{30}$ or $\frac{13}{30}$ **M1**
- their $\frac{13}{30} \times \frac{3}{2}$ **M1**
- $\frac{13}{20}$ or $\frac{39}{60}$ (or an equivalent fraction) **A1**

A correct fraction in your working but a decimal on the answer line scores M2 A0. Score: ____ / 3

AQA mark scheme: June 2025, Q8 (3 marks)

- Correct method to divide by $\frac{1}{2}$ (implied by $\frac{2}{5}$ or 0.4) **M1**
- Correct method to add two fractions with different denominators **M1**
- $\frac{2}{3}$ (or an equivalent fraction, e.g. $\frac{10}{15}$) **A1**

Division comes before addition, so $\frac{1}{5} \div \frac{1}{2} = \frac{2}{5}$ first, then $\frac{4}{15} + \frac{6}{15} = \frac{10}{15} = \frac{2}{3}$. Score: ____ / 3
