Megacities: develop your points

Year 8 Geography · Cities · Skill: develop it | About 30 minutes, by hand | Name: _____ Date: _____

Use your own notes. Evidence goes in the bank first. Nothing in your answer should be a fact you cannot find there. If you are unsure, mark it “not sure” and ask your teacher.

1 · Evidence bank (6 min) [from your notes]

Fill in **two** specific facts for each megacity: a named place, a number, or a named scheme. Tick where each came from.

Megacity	Specific fact 1	Specific fact 2	From?
Shanghai			☐ notes ☐ not sure
Another city you have studied: _____			☐ notes ☐ not sure

2 · Exam-style question [4 marks]

1. Explain **two** problems that rapid growth can cause in a megacity you have studied. *(Name the megacity.)*

How to earn the marks: for each problem, state it (1 mark), then develop it with specific evidence and “which means…” (1 mark). Two problems, two developed points.

Megacity: _____

Problem 1 (point, evidence, “which means…”):

Problem 2 (point, evidence, “which means…”):

3 · Short answer [2 marks]

2. Describe **one** way a megacity is trying to improve life for its people. Give a named example from your notes and say what difference it makes.

4 · Looking ahead (optional, 3 min) [judgement]

3. Of your two problems, which is more serious for the people who live there, and why? *(This is the beginning of the 9-mark skill: a judgement, not just a list.)*

Self-check (5 min)

- ☐ Each point has a **named place, number or scheme**, not “lots of people” or “many problems”.
- ☐ Each “which means…” follows from the evidence and says what it does to **people**.
- ☐ I named the megacity in my answer.
- ☐ I only used facts from my notes, and marked anything unsure.

Oral check (5 min, with a parent)

Say it out loud, from memory if you can. Parent asks: **“So what does that mean for the people who live there?” (She answers about one of her points, out loud.)**

Parent tick: ☐ answered without reading it ☐ answered with a prompt ☐ could not yet

Weekly review (for J, 5 min)

Which megacities did the class actually cover?	
What was weak this week?	
What worked?	
Time taken (HTML / written / total)	
One change for next week	

Parent key and what to look for

Her answers come from her own notes, so there is no single key. This is what a developed 4-mark answer looks like. Both use cities from the on-screen drill, not hers; they show the shape.

Model, Q1 (shape only): *One problem in Lagos is traffic congestion. Lagos is known for "go-slow" jams that can keep people in their cars for hours, which means journeys to work are slow and unreliable, so people lose time and income. A second problem is housing. People move to the city looking for work, which means demand for homes is greater than the city can supply, so informal settlements grow where services such as sanitation can be limited.*

Marking guide:

Marks	What it looks like
1	One problem stated, with no evidence or no development ("Traffic is a problem.").
2	One developed problem with specific evidence and a "which means…", or two problems stated but not developed.
3	One fully developed problem and one partly developed.
4	Two problems, each stated, with specific evidence and a "which means…" about people.

Watch for vague words: "lots", "many", "bad", "good", "a big problem". Ask her to swap each one for a name, a number, or a named scheme from her notes. That is last week's skill, still running.

Q3 (optional): A good judgement compares: "The housing problem is more serious because it affects health every day, while traffic mainly costs time." A list of both problems with no comparison is not yet a judgement. Do not push this one if the other parts took long.

One check please: which megacities has the class studied? If it is not Shanghai plus one more, tell me and I will use the right ones next week.
